#### ABSTRACT

This report provides tabular data on baccalaureate and higher degrees. Data were obtained from the survey of "Degrees and other Formal Awards Conferred Between July 1, 1,970 and June 30, 1971" conducted by the U.S. Office of Education. Highlights indicated: (1) More than 1.1 million degrees were conferred at the bachelor's and higher levels in 1970-71 by 1,644 institutions of higher education in the U.S. (2) Publicly controlled institutions awarded 65% of the degrees in 1970-71 and 1969-70, up from 63% in 1968-69. (3) In 1970-71, publicly controlled institutions awarded 66% of the bachelor's degrees, 43% of the first-professional degrees, 66% of the master's degrees, and 65% of the doctor's degrees. (4) Men received 59% of all degrees in 1970-71 and 60% in 1969-70. (5) The largest discipline divisions, in terms of degrees conferred: 54% of all bachelors degrees were in education, social sciences and business and management; 57% of all master's degrees were in education, business and management, and social sciences; and 45% of all doctor's degrees were in education, physical sciences, and social sciences. (6) Elementary education had the highest number of degrees at the bachelor's and master's level; law, at the first-professional level; and chemistry, at the doctor's level. (7) All institutions to which the survey instrument was sent responded to the request for data. (Author/MJM)

#### HIGHLIGHTS

- i. More than 1.1 million (1,147,985) degrees were conferred at the bachelor's and higher levels in 1970-71 by 1,644 institutions of higher education in the United States. This was an increase of 75,404 degrees (or about 7 percent) over the 1,072,581 awarded in 1969-70 by 1,617 institutions.
- 2. Publicly controlled institutions awarded 65 percent of the degrees in 1970-71 and 1969-70, up from 65 percent in 1968-69. The numbers of degrees awarded by these institutions showed 1-year increases of 9 percent in 1970-71 and 11 percent in 1969-70. For privately controlled institutions, the respective increases were 4 and 5 percent.
- 3. In 1970-71, publicly controlled institutions awarded 66 percent of the bachelor's degrees, 43 percent of the first-professional degrees, 66 percent of the master's degrees, and 65 percent of the doctor's degrees. In 1969-70, they awarded 66, 42, 65, and 64 percent, respectively.
- 4. Men received 59 percent of all degrees in 1970-71 and 60 percent in 1969-70. At the various degree levels, the proportions of degrees awarded to men have changed very little over the past 3 years.
- 5. For the largest discipline divisions, in terms of the number of degrees conferred:
  - 54 percent of all bachglor's degrees were in education (177,638), social sciences (156,698), and business and management (116,709).
  - 57 percent of all master's degrees were in education (89,667), business and management (26,654), and social sciences (16,522).
  - 45 percent of all doctor's degrees were in education (6,398), physical sciences (4,391), and social sciences (3,659).
- 6. In specific discipline specialties, elementary education had the highest number of degrees at the bachelor's and master's levels; law, at the first-professional level; and chemistry, at the doctor's level. The same field at each level has been reported as ranking first in each annual survey since 1964-65.
- 7. All institutions to which the survey instrument was sent responded to the U.S. Office of Education request for data. This is the third consecutive year in which a 100-percent response was obtained in this survey.

#### **FOREWORD**

This publication on earned degrees conferred by institutions of higher education in the United States is based on the survey instrument "Degrees and Other Formal Awards Conferred Between July 1, 1970 and June 30, 1971," part of the sixth annual Higher Education General Information Survey (HEGIS). Data on earned degrees have been published regularly by the Office of Education since its first statistical survey for the academic year 1869-70.

The tables in this report provide data on baccalaureate and higher degrees. Detailed information on awards below the bachelor's level will be presented in a separate report entitled Associate Degrees and Other Formal Awards Below the Baccalaureate, 1970-71.

The continuing cooperation of the college and university officials in responding to this survey is most gratifying and appreciated.

Theodore H. Drews, Chief Higher Education Surveys Branch

#### INTRODUCTION

The data in this report were obtained from the survey of "Degrees and Other Formal Awards Conferred Between July 1, 1970 and June 30. 1971" conducted by the U.S. Office of Education. This survey was part of the sixth annual Higher Education General Information Survey (HEGIS). Contained in this report are institutional and summary data on bachelor's and higher degrees. In each of the three immediately preceding survey years, institutional and summary data were presented in two separate publications. (Detailed information on awards below the bachelor's level is presented in a separate series, entitled Associate Degrees and Other Formal Awards Below the Baccalaureate.)

Included in the present publication are summary tables by level of degree, discipline specialty, sex of degree recipient, State, and control and level of institution. Comparisons are made with data for earlier survey years. There are also three tables containing data from each of the 1,644 institutions represented in the survey: One summarizes the degrees conferred by each institution, by level of degree and sex of student; the other two, which make up the bulk of this publication, list the number of degrees conferred within each discipline specialty at each institution, one at the bachelor's, master's, and doctor's levels and the other at the first-professional level. The data on intermediate degrees that have been gathered for the past 2 survey years (1969-70 and 1970-71) are also presented.

A copy of the portion of the 1970-71 report form (parts A and B) pertaining to bachelor's and higher degrees, together with definitions and instructions to respondents, is reproduced in appendix A. Also included in appendix A are data on intermediate degrees (page 28 of the report form). (Note.--The remainder of the report form (part C) concerns awards below the bachelor's level.) The totals shown in the data cells on the facsimile form are those obtained for the aggregate United States.

The sixth annual HEGIS, in 1971-72, which acquired these data for degrees awarded during 1970-71, was the first to utilize the new classification of fields of study published in A Taxonomy of Instructional Programs in Higher Education (OE-50064). (See appendix B for a reproduction of the material in that publication.) The Taxonomy has made extensive reorganization of the categories of data in such a way as to reflect the most common modern practices in institutions of higher education.

Survey data on bachelor's and higher degrees may be considered comparable for the years 1965-66 through 1969-70. When making comparisons for years before 1965-66, care must be exercised because degree levels were redefined for the 1965-66 survey. (For a detailed description of the differences between the 1965-66 survey and earlier surveys, see <u>Earned</u> Degrees Conferred, 1965-66 (OE-54013-66).

The introduction of the new field classification system beginning with the 1970-71 survey means that any comparisons with data for previous years should be made with care. A degree of comparability is possible through the use of a "translation table." However, the addition of new fields, together with the changed distributions and descriptions of fields formerly included, has changed the classification base to such an extent that in many cases significant comparisons would be impossible. For example, Trade or Industrial Training, which was an area of study in the 1969-70 survey (code 8000), is now shown under Engineering technologies (code 0925), as part of the discipline division of Engineering.

Instructions to the survey respondents (page 2 of the survey report form, appendix A) nighlight the orientation of the classification structure. For discussion of the background and purposes of the Taxonomy, as well as for the translation table pertaining to HEGIS, see the reproduction of the Taxonomy (appendix B).

A description of the survey coverage and methodology used in preparing the HEGIS data is contained in another section of this report.

#### CURRENT TRENDS

Bachelor's and higher degrees conferred exceeded 1.1 million (1,147,985) in 1970-71 and were awarded by 1,644 institutions of higher education in the United States. This represents an increase of 7.0 percent (75,404) over the 1,072,581 degrees conferred by 1,617 institutions in 1969-70.

Bachelor's degrees increased 6.0 percent in 1970-71. This rate was below the 8.7-percent growth for 1969-70 and far below the 15.3-percent rise in 1968-69. Master's degrees increased 10.6 percent in 1970-71, compared with a 7.7-percent increase in 1969-70, and a 9.7-percent increase in 1968-69. Doctor's degrees showed a gain of 7.5 percent. This increase was considerably below the 14.1-percent growth in 1969-70 and the 13.4-percent gain in 1968-69. First-professional degrees increased 8.6 percent in 1970-71, a marked change from the 1.2-percent decrease in 1969-70 and the 2.7-percent increase in 1968-69.

Publicly controlled institutions awarded 65 percent of all degrees in both 1970-71 and 1969-70, and 63 percent in 1968-69. The total number of degrees awarded by these institutions in 1970-71 was 9 percent over the 1969-70 figure, and the number in 1969-70 was in turn 11 percent over the 1968-69 figure. In both 1970-71 and 1969-70, universities accounted for 56 percent of total degrees in publicly controlled institutions; "other 4-year," 44 percent. In 1968-69, publicly controlled universities awarded 58 percent of all degrees in publicly controlled institutions; other 4-year, 42 percent.

Privately controlled institutions awarded 35 percent of all degrees in both 1970-71 and 1969-70, and 37 percent in 1968-69. The total number of degrees in privately controlled institutions in 1970-71 was 4 percent over the 1969-70 figure, and those in 1969-70 were 3 percent over the 1968-69 figure. In 1970-71, universities accounted for 40 percent of total degrees in privately controlled institutions; other 4-year, 60 percent. In 1969-70 and 1968-69 the comparable percentages for privately controlled universities were 39 percent and 40 percent, respectively.

The question may arise as to whether increases in numbers of public institutions vs. private institutions are a factor in the relative rates of increase in number of degrees. This appears not to be the case in comparisons of 1970-71 data with 1969-70 data; there was approximately a 2-percent increase in both the public and private sectors in 1970-71 as compared with 1969-70. In 1969-70 as compared with 1968-69 the increase was 2 percent for the public and 1 p rcent for the private.

Publicly controlled institutions in 1970-71 awarded 66 percent of all bachelor's, 43 percent of all first-professional, 66 percent of all master's, and 65 percent of all doctor's degrees. In 1969-70, they were as follows Bachelor's, 66 percent; first-professional, 42 percent; master's, 65 percent; and doctor's, 64 percent.

Men received 59 percent of all degrees in 1970-71 and 60 percent in 1969-70. At the various degree levels in 1970-71, the percents of degrees awarded to men and women remained quite similar to the figures for the 2 preceding years.

### Percent of degrees awarded

Level of degree	1970-71	1969-70	1968-69
	Men Women	Men Women	Men Women
Total	. 59 41	60 40	60 40 -
Bachelor's	. 57 43	57 43	56 44
First-professional	. 94 6	95 · 5	95 5
Master's		60 40	63 37
Doctor's	. 86 14	87 13	87 13

Data were obtained for 24 discipline divisions. Three of these together contributed more than half (54 percent) of all bachelor's degrees--177,638 in education (21 percent), 156,698 in social sciences (19 percent), and 116,709 in business and management (14 percent). At the master's level, 50 percent of the degrees came from two discipline divisions: education (89,067--38 percent) and business and management (26,654--12 percent). At the doctor's level 45 percent of the degrees were in three discipline divisions: education (6,398--20 percent), physical sciences (4,391--14 percent), and social sciences (3,659--11 percent).

This survey obtained data on 317 detailed discipline specialties within the 24 discipline divisions. The discipline specialties having the highest numbers of degrees, by level, were elementary education, with 90,970 at the bachelor's level and 17,079 at the master's level; law, with 17,652 at the first professional level; and chemistry, with 1,953 at the doctor's level. These same discipline specialties have ranked first in each annual survey since 1964-65.

Over the past several years, members of the academic community and professional organizations have evinced a keen interest in the increased usage of "intermediate degrees" by institutions of higher education; that is, recognition (degree or certificate) for a program intermediate between the master's degree and the doctor's degree, which in essence is the doctor's degree without the dissertation. To obtain information on degrees at this level, which are not included in any other part of the survey instrument, an unstructured question on intermediate degrees was added to both the 1969-70 and 1970-71 survey instruments, with the institution reporting intermediate degrees by name of degree or certificate and the number of students receiving them.

In 1969-70 there were 3,274 intermediate degrees reported by 30 institutions in 22 States. In 1970-71, 47 institutions in 28 States awarded 4,609 intermediate degrees. Among the various types of intermediate degrees, both in 1969-70 and 1970-71, the candidate in philosophy was by far the largest category, being 80 percent (2,626) of all intermediate degrees represented in 1969-70 and 65 percent (3,014) in 1970-71. In viewing the rise in the use of intermediate degrees by institutions of higher education it is well to note that 1969-70 was the first year in which data on intermediate degrees were gathered, and for that reason alone the data may not be as reliable as those reported in 1970-71, the second year. Also, the instructions for reporting intermediate degrees changed. The doctor of arts degree was included as an intermediate degree in 1969-70 but was excluded in 1970-71. It was originally envisioned that the doctor of arts degree was more closely related to the intermediate degree (as was viewed in the 1969-70 survey instructions); but practice in the academic community, coupled with views held by professional societies and the established policy in graduate programs in the Office of Education, has moved in the direction of treating the doctor of arts degree as a traditional doctor's degree (as was done in the

1970-71 survey instructions). All of the intermediate degrees, other than the doctor of arts degrees reported in 1969-70, are presented in the one tabulation of intermediate degrees (table 10). The deletion of the doctor of arts degrees for 1969-70 from table 10 makes the data on intermediate degrees for 1969-70 and 1970-71 comparable.

SURVEY COVERAGE AND METHODOLOGY

### Institutions Included

This report is based on data furnished by 1,644 institutions of higher education in the United States and outlying areas ("aggregate United States"). These constitute all of the institutions in the Office of Education's higher education survey universe that, as far as the Orfice of Education could determine, conferred bachelor's or higher degrees during the period from July 1, 1970, through June 30, 1971. The survey universe for earned degrees is based on the list of institutions included in the Education Directory, 1969-70, Higher Education (OE-50000-70), with such changes in the fall of 1970 as were known to the Office of Education. The questionnaire "Degrees and Other Formal Awards Conferred Between July 1, 1970 and June 30, 1971"--part of the sixth Higher Education General Information Survey (HEGIS) -- was sent to all universities and other 4-year institutions in this universe. Each institution was requested to supply data in all applicable parts of the survey--lata on bachelor's and higher degrees as well as on awards below the bachclor's level. (The present report is confined to data on bachelor's and higher degrees.) The Office of Education staff made extensive efforts to obtain a full response from every institution in the survey universe. Since each of the 1,644 institutions responded with complete survey data, it was unnecessary for the Office of Education to make any imputations or to provide any estimates for data by sex of student, level of degree, or discipline specialty.

The numbers of institutions in the 1970-71 survey of earned degrees were as follows:

•		Cont	rol .
Level of institution	Total	Public	Private
All institutions	1,644	431	- 1.,213
Universities	160 1,484	95 336	65 1,148

There were 27 more institutions in this survey in 1970-71 than in 1969-70. Public other 4-year institutions added 7 institutions, while private other 4-year increased by 20. The number of universities in both the public and private sector remained the same for both years.

### Collection of vaca

In 1970-71 a major reorganization of the content of the survey was necessary to bring into use the new classification of discipline divisions and discipline specialties contained in the Taxonomy of Instructional Programs in Higher Education (OE-50064). (See appendix B.) A determined effort was made to provide institutions with both advance information and time to convert internal recordkeeping procedures to the new taxonomy categories. The taxonomy was the result of several years of effort in cooperation with the higher education community. The developmental work on the taxonomy included

extensive consultation, and review. Preliminary copies for comment and criticism were sent to all colleges and universities in the United States, to a large number of educational associations and organizations, and to Federal agencies concerned with education. The final version was developed cooperatively by the National Center for Educational Statistics and the Bureau of Research, both of the U.S. Office of Education, and the National Center for Higher Education Management Systems at WICHE. Copies of the published taxonomy were made available to all institutions of higher education early in January 1971, and another copy was enclosed with the HEGIS package containing the 1970-71 earned degrees survey.

It is planned to use the Taxonomy in all HEGIS surveys for data acquired by academic field. The use of the Taxonomy will make all HEGIS surveys for data on instructional programs consistent with one another, thereby facilitating studies of the relationships of different types of data.

### Verification of Data

To obtain complete and accurate data, the completed questionnaires were examined and analyzed, including review for compliance with the instructions to respondents. The data were further compared with available data reported by the respondents in questionnaires for previous earned degree surveys, taking into account the changes in the coding procedure as a result of the adoption of the taxonomy categories for instructional programs and using the table in the taxonomy which translates the fields of study used in the earlier surveys into the new coding system. Reference was frequently made to institutional catalogs and other materials for descriptions of programs and criteria. When appropriate, institutions were contacted by letter or telephone to obtain verification or revision of reported data. In some instances, when the number of degrees reported in any area was significantly larger or smaller than the number reported in the previous survey year, institutions provided explanatory information.

The instructions on the survey form request that the institutions classify degrees according to major field of study and to do so as specifically as the lists of specialties in the broad discipline divisions permit. For example, a student of educational psychology who is specializing in teaching the mentally retarded should be reported under "education of the mentally retarded" (code 0810), rather than in the somewhat broader category of "educational psychology" (code 0822) or in the broadest available category of "education, general" (code 0801). In practice, however, institutions can report data only to the level of detail provided in their individual recordkeeping systems. In some cases, therefore, readers may observe disparities between individual institutional programs as they know them and the manner in which they are shown in the institutional listings.

#### ORGANIZATION OF THE TABLES

The nine tables in this report have the same format as in the two 1969-70 reports, (Summary Data and Institutional Data), this year combined as one report. Separate counts are given by sex of student in all tables; other classifications vary from table to table.

Tables 4, 5, 6, 8, and 9 deal with discipline division and discipline specialty (formerly called area of study and field of study) and contain the new classification of instructional programs in accordance with A Taxonomy of Instructional Programs in Higher Education (appendix B). The reader should consult the translation table in the taxonomy when using these data based on the old and new coding systems. The remainder of the nine tables in this report--tables 1, 2, 3, and 7--are not affected in any way by adoption of the taxonomy.

Table 1 is a brief historical comparison of degrees conferred, by level of degree, from 1965-66 through 1970-71. Table 2 is a summary of the degrees conferred in 1970-71, by level of degree and control and level of institution. In this table, data are presented separately for universities and for other 4-year institutions. Classified as universities are institutions that give considerable stress to graduate instruction, confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other institutions offering 4 or more years of college\_level work, but not meeting the criteria for classification as universities, make up the "other 4-year" group. Tables 3, 3A, and 3B show State data for each of the degree levels. Table 4 gives bachelor's, master's, and doctor's degrees by discipline division. Table 5 shows the same information as table 4 by discipline specialty within discipline divisions. Table 6 presents data on firstprofessional degrees conferred in eight selected discipline specialties. Table 7 summa才izes degrees conferred by each institution in the survey, by sex of student and level (of degree; totals by State are also shown in this table. Table 8, which forms the bulk of this publication, gives the number of degrees conferred at the bachelor's, master's, and doctor's level in each discipline specialty by each institution. The institutions are listed alphabetically by State. Table 9 presents a similar listing for firstprofessional degrees. Table 10 summarizes intermediate degrees conferred in each of the two years for which such data were gathered, 1969-70 and 1070-71.

The following breakdowns of data may be obtained from the tables noted:

		•	Table number
1.	Control and level of institution		2
2.	Control of institution	: A	3A, 3B, 4, 6
3.	State or other area	7	3, 3A, 3B, 7, 8, 9
4.	Discipline division	÷	4 5, 8, 9
5.	Discipline specialty		5, 6, 8, 9
6.	Data for 1965-66 through 1970-71		1
7.	Institution	4	7, 8, 9
8.	Intermediate degrees by type of award	,	10
